DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- A. Claims 1-9, drawn to a general application of chance wherein the player is awarded a prize if spaces associated with a subset are selected under control of the gaming machine and the subset is completed, classified in class 273, subclass 269.
- B. Claim 10-15, drawn to a specific application of chance wherein the player is awarded a prize if a completion occurs within multiple cards wherein spaces are automatically selected upon maximum wager and the entire column associated with the selection is lit in sequential order to form a completed card, classified in class 463, subclass 17.

The inventions are distinct, each from the other because of the following reasons:

Inventions A and B are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention A has separate utility such as being a bingo-like game that can be played separate from the combination of the disclosed system. While the game can be played on the combination, the particulars of the combination are not required for the subcombination to sustain its method, thus it is separately usable. The subcombination could represent a bingo game that could be played without the aid of the combination wherein users could perform the steps of the method manually. The game is very similar to the well-known game of Bingo wherein the minuscule differences do not prevent the game from being separately played without the aid of the combination. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification as well as the fact that the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 3713

A telephone call was made to Scott Schaffer on 22 January 2004 to inform of the above restriction requirement. However, it has been determined a written restriction more readily identifies the issue of restriction at hand.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. Marks whose telephone number is (703)-305-7497. The examiner can normally be reached on Monday - Thursday (7:30AM - 5:30 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teresa J Walberg can be reached on (703)-308-1327. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)-308-1148.
